Art Unit: 3627

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1,2, and 4-7, drawn to an inventory control system with an actual value calculating means, predicted remainder calculating means, parameter calculating means, and safety stock calculating means, classified in class 235, subclass 385.
- II. Claim 3, drawn to an inventory control system with a supply plan calculating means, progress managing means, and inventory analyzing means, classified in class 235, subclass 385.
- III. Claim 8, drawn to an inventory control method, classified in class 705, subclass 28.
- IV. Claim 9, drawn to an inventory control method in which a planning cycle corresponds to a time period for establishing a plan, classified in class 705, subclass 28.
- V. Claims 10 and 12, drawn to an inventory control fee-collecting method copying data of a designated table, classified in class 705, subclass 28.
- VI. Claims 11 and 13, drawn to an inventory control fee-collecting method controlling to read data of a data table, classified in class 705, subclass 28.

Art Unit: 3627

VII. Claim 14, drawn to a computer program product reading data of an area and executing calculating process operation, classified in class 703, subclass 6.

Page 3

- VIII. Claim 15, drawn to a computer program product accepting updating a setting value and changing the way a time period is to be calculated, classified in class 703, subclass 6.
- IX. Claims 16 and 18, drawn to an a computer program product copying data of a designated table, classified in class 703, subclass 6.
- X. Claims 17 and 19, drawn to a computer program product controlling to read data of a data table, classified in class class 703, subclass 6.

The inventions are distinct, each from the other because of the following reasons:

- 1. Inventions I and II are directed to related products. The related inventions are distinct if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed have a materially different design, mode of operation, function, or effect. Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.
- 2. Inventions I through VI are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus

Application/Control Number: 10/634,759 Page 4

Art Unit: 3627

as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process inventory control fee collecting method can be done by hand.

- 3. Inventions III, IV, V, and VI are directed to related processes. The related inventions are distinct if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed have a materially different design, mode of operation, function, or effect. Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.
- 4. Inventions VII, VIII, IX, and X are directed to related products. The related inventions are distinct if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed have a materially different design, mode of operation, function, or effect. Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.

5. This application contains claims directed to the following patentably distinct species:

I, the specie depicted by Figures 3-8;

II, the specie depicted by Figures 10-13;

III, the specie depicted by Figures 14-20;

IV, the specie depicted by Figures 26-32;

V, the specie depicted by Figures 36-38;

The species are independent or distinct because specie I flow operations, specie II discloses stock safety calculations, specie III discloses explaining process operations, specie IV discloses output screens of the client machine, and specie V discloses explaining another mode of the fee system.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, it appears none of the claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 3627

the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

6. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

7. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fawaad Haider whose telephone number is 571-272-7178. The examiner can normally be reached on Monday-Friday 7:30-5:00.

Art Unit: 3627

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor Ryan Zeender can be reached on 571-272-6790. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only, For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
